Dear Sir,

We acknowledge receipt of your request concerning the hydrotreatment and isomerization of light reformer for the Roma Refinery.

We are going to proceed with our study in due time and will be contacting you in the near future regarding questions or clarifications which might arise.

We will be pleased to cooperate with you on this subject.

We are confident that building on the strengths of both companies and on the quality of your staff, we can cooperate successfully on other potential applications of our hydrotreatment technologies.

Best regards

J.C. BARBIER
Industrial Director
